## SUMMARY

1 year Frontend Webflow (commercial) + 2 years React/Express (portfolio + deployed projects). Skilled in JavaScript/TypeScript, React.js, Express.js, Tailwind, SCSS/SASS, and modern UI libraries (Material UI, Shadcn UI). Experienced in building responsive, accessible, and SEO-friendly interfaces, integrating custom APIs, and optimizing performance. I have practical experience in PostgreSQL, JWT, Redis, Docker and deployment projects on Vercel.

## EXPERIENCE

### Frontend Webflow Developer

Bright Web Studio

🕒 1 year 5 months

📅 Mar 2024 - Jul 2025

📍 Lviv, UA, Hybrid

- Translated Figma designs into pixel-perfect, responsive Webflow websites, improving design-to-development accuracy and user satisfaction
- Optimized websites for performance, SEO, and responsiveness, leading to faster load times and higher search visibility
- Maintained and updated existing Webflow sites, ensuring reliability and continuous improvement

### AI-powered face detection Full-stack app

GitHub project

🕒 1 year 10 months

📅 Nov 2023 - Sep 2025

📍 Remote

- Secured API key leaks in Chrome DevTools Network tab by moving ClarifAI image processing from the client-side to the server
- Resolved CORS errors when downloading images with applied filters by deploying the Express endpoint and handled image requests through a CORS proxy
- Resolved Vercel's read-only server issue when updating user profile images by storing images in Amazon S3 and saving URLs in the DB

### Chair store E-Commerce React Firebase app

GitHub project

🕒 8 months

📅 Feb 2025 - Oct 2025

📍 Remote

- Secured Stripe secret keys by moving payment intent creation from the client to a serverless AWS function
- Resolved Firestore user document creation errors by properly awaiting async operations before submission
- Improved filter state management by consolidating all filters into one object and syncing updates via useEffect
- Fixed TypeScript typing issues across actions, reducers, and global state for consistent type safety

### Task manager with kanban & pomodoro pure JS app

GitHub project

🕒 1 year 6 months

📅 Aug 2023 - Feb 2025

📍 Remote

- Efficiently removed event listeners by debugging the code and using Chrome DevTools EventListeners Tab
- Improved app accessibility by restoring Tab key focus after DOM re-renders with assigning each task a unique ID and tracked focused element dynamically inside it
- Maintained the Pomodoro timer state across DOM updates by leveraging localStorage to persist the timer and session data

## Automation Content Manager

**BRWmania**

⌚ 4 years 1 month

📅 Nov 2019 - Dec 2023

📍 Lviv, UA, Hybrid

- Streamlined pricing management by centralizing data with Google Docs formulas, achieving 4× faster price updates across multiple clients.
- Recovered and validated product color data after a site crash, ensuring 100% data accuracy for the catalog.
- Enhanced pricing data security in Google Docs, reducing the risk of unauthorized access and errors.
- Automated stock availability updates on Rozetka using Excel inventory integration, delivering 4× faster and more reliable updates

## UI Engineer

**EMV-Energo**

⌚ 7 years 8 months

📅 Jun 2011 - Sep 2019

📍 Lviv, UA

- Collaborated with developers to deliver projects on time and aligned with business goals
- Improved development efficiency by preparing reusable UI components library

## SOME OF PROJECTS

- LEADER - Rechargeable tools E-commerce (Developed: 4 sections of Leaders)
- VELUDO Studio High quality architectural 3D visualization studio (Developed sections: Services, About, Our recent)
- Casas Serenas Houses - Book a House in island of Madeira (Developed sections: Choose House, Location, Living Conditions, Recommendations)
- LEOLING Foreign Language Learning Center (Developed sections: Header, Hero, Advantages, and Courses)
